ITALDIBIPACK

SINCE 1975

**MANUFACTURER
INNOVATOR
INVENTOR**

ALWAYS, THE **SMARTEST**
AND **MOST INNOVATIVE**
PACKAGING SOLUTIONS

IDEAS IN CONTINUOUS EVOLUTION

**EXCLUSIVE DESIGN - INNOVATIVE TECHNOLOGY
UNIQUE MASTERPIECES - 100% MADE IN ITALY**

Since 1975, at the worldwide forefront in heat-shrinking, wrapping, pallets wrappers and end-of-line packaging equipment.

For over 40 years **ITALDIBIPACK GROUP** has been a world-leading manufacturer of heat-shrinking wrapping machines (the core business of the Company), developing during its long term history, the widest range of packaging machines in the world: the best and the most innovative packaging solutions of stretch pallets wrappers, a new generation of flow-pack and pillow-pack line, with a complete and recommended end of line equipment. **ITALDIBIPACK GROUP** is a leading Company for the number of systems sold to worldwide end users, developing over time an unequalled know-how across all application sectors. **ITALDIBIPACK GROUP** is the only Company on the market able to pick up the various Customer needs and turn them into winning solutions.

Those who choose **ITALDIBIPACK GROUP** choose: high performance, functional simplicity, innovative design.

Nowadays **ITALDIBIPACK GROUP** operates in a wide number of countries all around the world through direct companies, subsidiaries and through a large network of well-established distributors. All this to provide Customers with the best support at the sale stage, but especially at the after-sales stage. A Company that looks to the future with a solid past behind.

The future of **ITALDIBIPACK GROUP** goes through a positive evolution of men, technologies and strategies.

SINCE 1975

A SOLID COMPANY

A UNIQUE RANGE

of complete packaging products and solutions, supported and guaranteed by a world-class brand, with a strong background of unmatched direct application experiences.

A UNIQUE STAFF ABLE TO PROVIDE:

- qualified, ongoing, prompt technical before as after sales service
- expert and qualified maintenance

MACHINES, EQUIPMENT, SYSTEMS, LINES AND ACCESSORIES complete solutions from heat-shrinking, flow-pack wrapping, stretch pallet wrappers and end of line packaging solutions.

Always available and visible for demos and operating tests in our show rooms.

► **GO TO PAGE 10**

CONSUMABLES always ready in stock, from adhesive tapes to heat-shrinking and extensible materials selected for the best operating interaction with our systems.

► **GO TO PAGE 37**

WHY ITALDIBIPACK GROUP?

Always the first to propose innovative and exclusive solutions, to collect the most different requests from the market and turn them into winning solutions.

Thanks to nearly 45 years of work 'on the field' and the unrivalled experiences made with our Customers, the **ITALDIBIPACK** brand is now one of the most popular heat-shrink wrapping icon in the world.

ITALDIBIPACK GROUP is a leading Company in terms of the number of systems sold and references acquired. A potential reinvested, year after year, by the Group in a formidable know-how consisting of machines and materials made available to our Customers. With the creation of its direct ID Point Companies, in Italy **ITALDIBIPACK GROUP** also picked up on other basic needs of our time - the need for a prompt support service and delivery, the importance for users of viewing and testing machines directly, seeing them for themselves, with the assistance of competent and helpful staff.

WE HAVE BEEN THE FIRST...

- IN THE WORLD TO OFFER SIMPLIFIED ONE STEP SHRINK-WRAPPING SYSTEMS
- IN ITALY TO OFFER STRETCH PALLETS WRAPPING SYSTEMS WITH TURNTABLES
- ON THE MARKET TO OFFER SIMPLIFIED SLEEVE-WRAPPING SYSTEMS

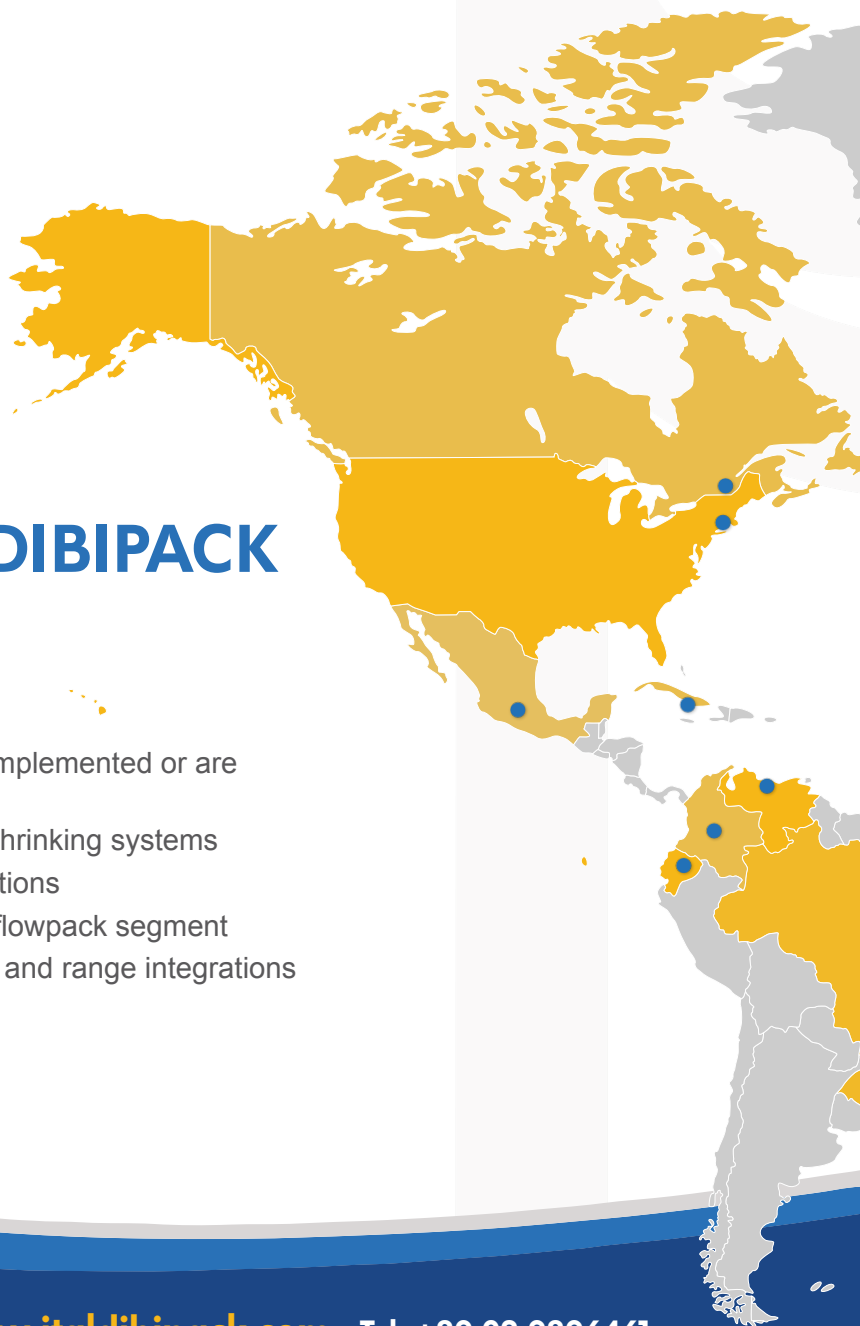

THE FUTURE OF ITALDIBIPACK IS ALREADY HERE

A UNIQUE DESIRE TO GROW

through new proposals that have already been implemented or are about to be implemented:

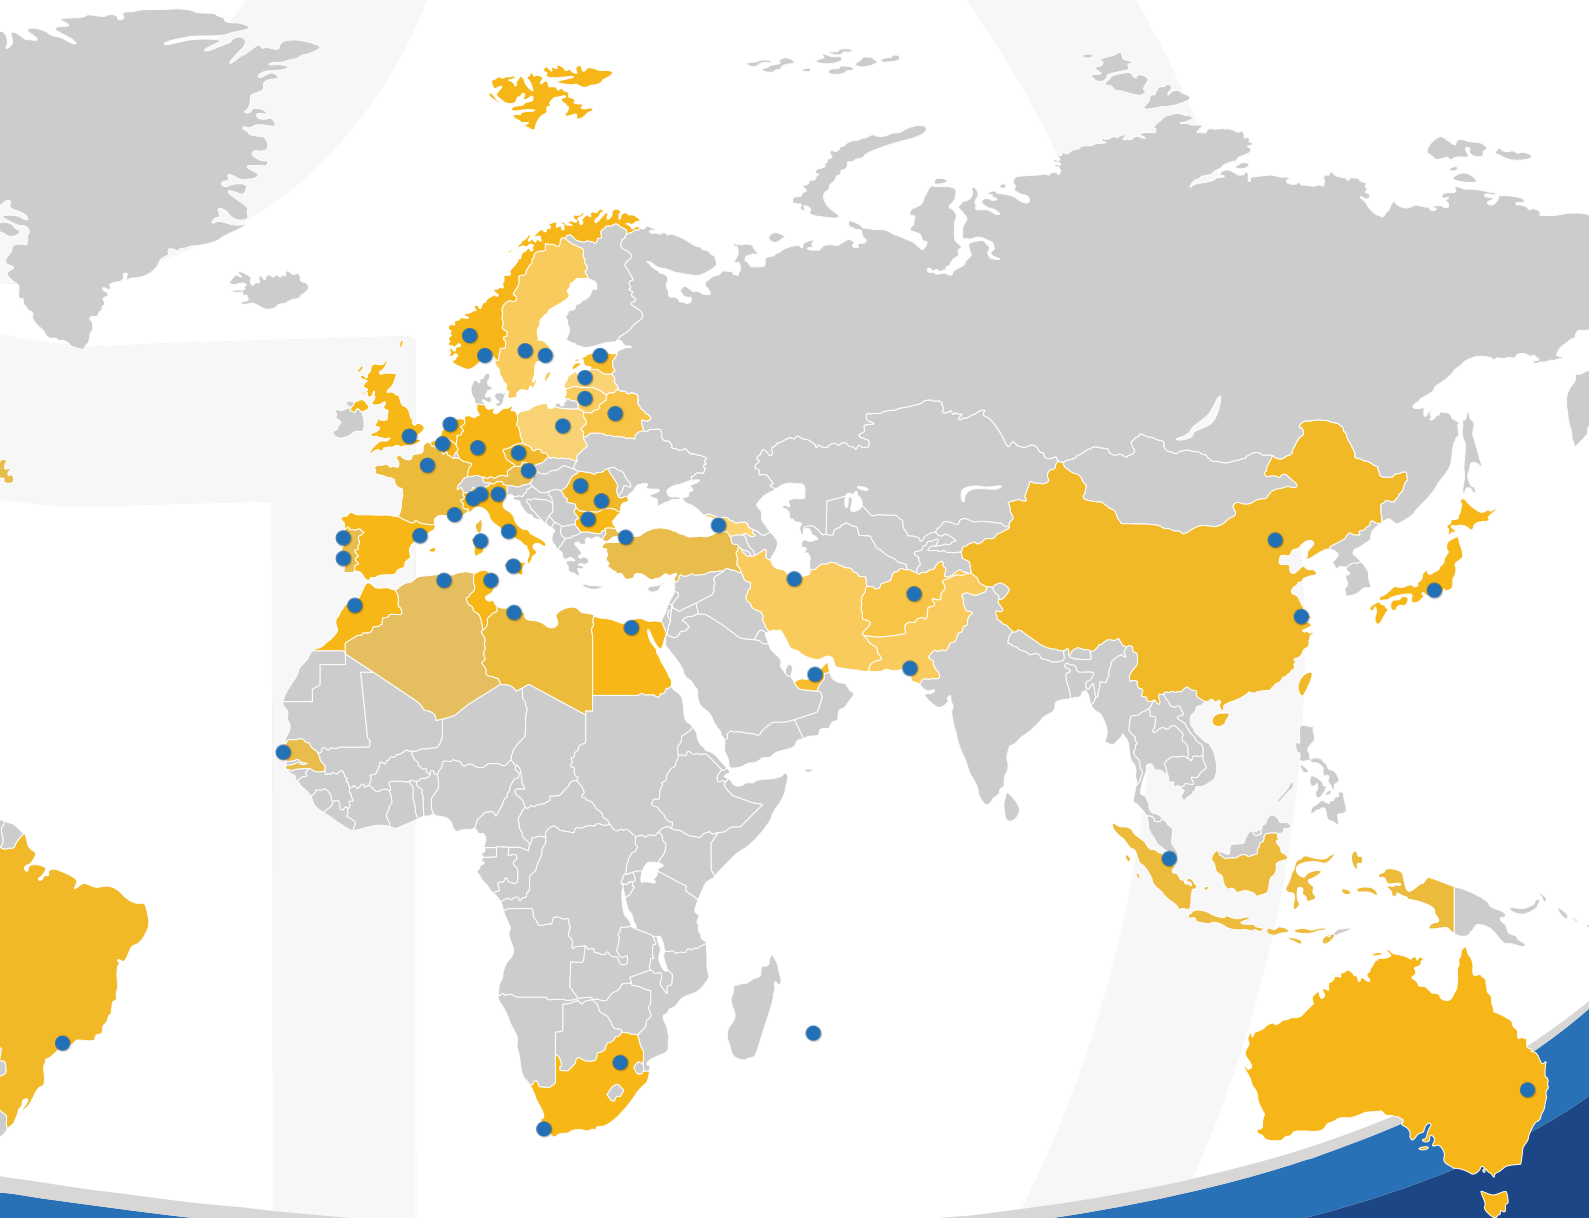

- implementation and innovation of all our heat-shrinking systems
- technological and cutting-edge end-of-line solutions
- versatile and next-generation solutions for the flowpack segment
- new synergistic products for further extensions and range integrations

WORLDWIDE

ITALDIBIPACK GROUP is now a top industrial and commercial reality on the international packaging landscape. A well-established presence across Europe, the US and worldwide.

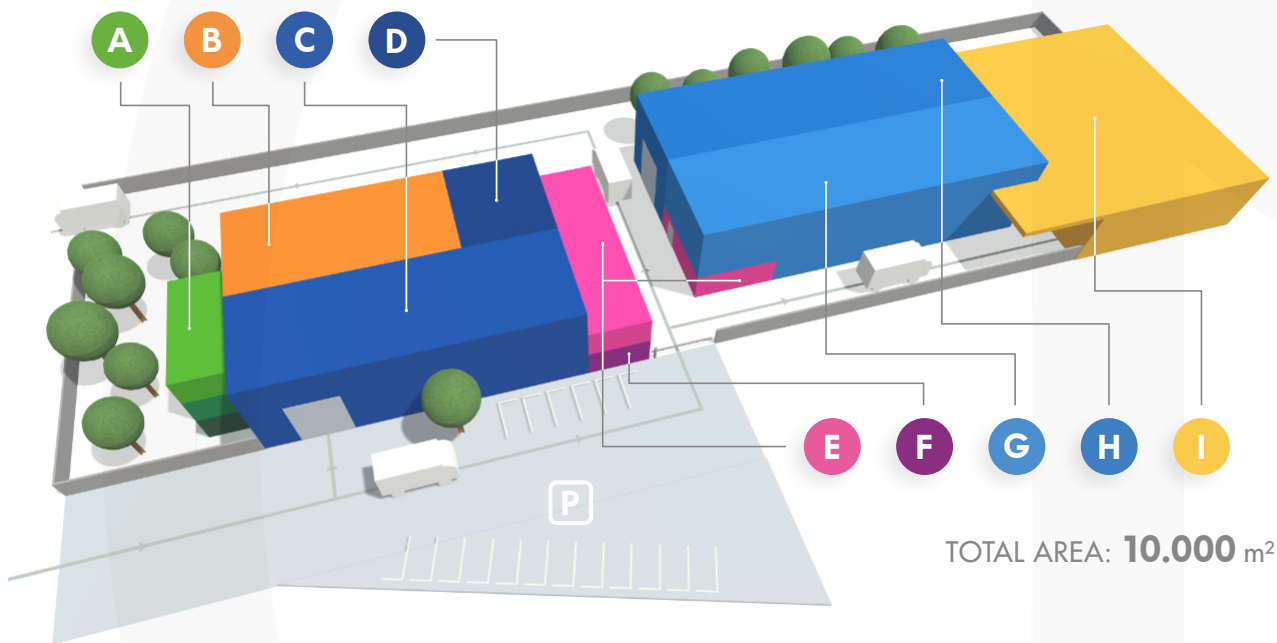

ITALDIBIPACK GROUP operates directly, with its subsidiaries or authorised distributors in the major Countries across the world. Together, all these productive and commercial realities form an important network that "speaks the same language" and sells the same products from one corner of the globe to another.

MANUAL HEAT-SHRINKING SYSTEMS

DIBIPACK LINE

The most popular one-step simplified systems: DIBIPACK born by those who invented the simplified heat-shrinking wrapping market!

Thanks to an unequalled experience across all application sectors DIBIPACK is the most innovative manual heat shrinking machine!

DIBIPACK 4255 EVX *

DIBIPACK 3246 EVX *

* SAVING ENERGY

possibility to program heat shrinking process after a set number of sealing cycles (2, 3, 4 or more), saving more than 50% of electricity.

Single sealing and shrinking of more products together

Remove more products together from the sealing area improving the output speed.

DIBIPACK 85130

DIBIPACK 6084

MORE THAN 10 MODELS

GREAT OPPORTUNITIES AT VERY LOW COSTS
SIMULTANEOUS SEALING AND SHRINKING

IDEAL

for the commercial and distribution sectors, but also for manufacturing businesses that do not require high packaging speeds **to serve the most varied production cycles such as collection units or units to assemble parts**

SWING

- ✓ **BEAUTIFUL – SOPHISTICATED**
- ✓ **AEROSPACEAL STRUCTURE AND TECHNOLOGY**

SWING

SEMI-AUTOMATIC HEAT-SHRINKING

ESPERT LINE, FAST AND STURDY

On all ESPERT machines, the sealing frame is closed automatically, as is the transfer from the sealing machine to the tunnel.

**IDEAL FOR VARIOUS PRODUCT CATEGORIES,
BOTH FOOD-RELATED AND NON-FOOD RELATED**

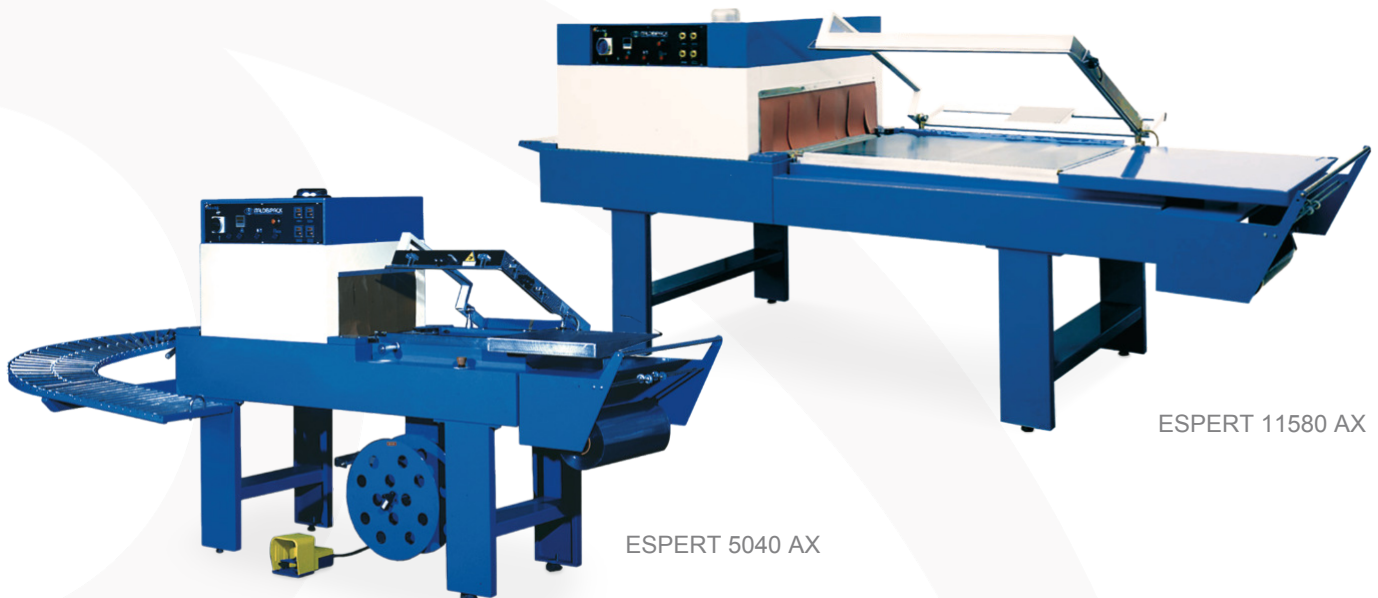

ESPERT EV LINE

MODERN AND ELEGANT DESIGN

**OPTIMAL INSULATION CONDITIONS IN THE
SHRINKING TUNNEL FOR LOWER ENERGY
CONSUMPTION AND BETTER PERFORMANCE**

Available in a mechanical and pneumatic version.

ESPERT 5040 AX

ESPERT 11580 AX

IDEAL

for manufacturing activities requiring medium-high packaging speeds to work with different types of films to be put in line but also, alternatively, to form packaging units

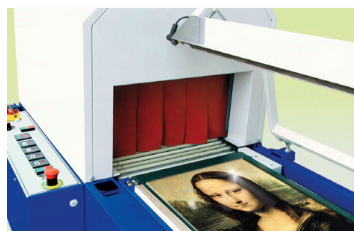

EXTRA FORMAT AVAILABLE UPON REQUEST

TURBOPACK

Semi-automatic sealing machines with sealing bar opening carried out automatically or with a pedal.

CUSTOMIZED ON REQUEST

AUTOMATIC HEAT-SHRINKING SYSTEMS

PLC

To manage all the machine functions.

You can save up to 200 programs.

MECPACK LINE

L-SEALERS WITH HEAT SHRINKING TUNNEL

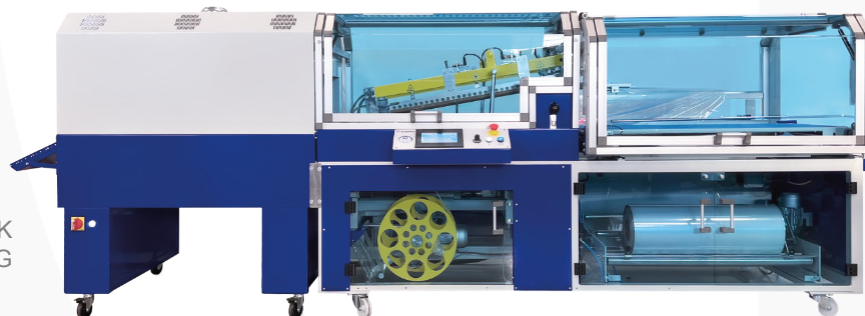

- COMPACT ANGULAR AUTOMATIC LINES FOR HEAT-SHRINKING PACKAGING
- HIGH TECHNOLOGICAL AND QUALITY STANDARDS
- MODERN DESIGN

MECPACK

The success achieved with UNIQUE has pushed Italdibipack to invest in creating the new XK model, fitted with unmatched functional and qualitative standards

UNIQUE XK

FLOWPACK MACHINES

DIBIFLOW MC

THE NEW GENERATION OF FLOWPACK MACHINES, GREAT PERFORMANCE IN THE SMALLEST POSSIBLE OPERATIONAL SPACE

DIBIFLOW MC

AUTOMATIC HORIZONTAL PACKAGING MACHINE

Electromechanical controls, a fixed conformer already included!
Ideal for single products and average productions.
30/40 products per minute.

Available in stainless steel.

DIBIFLOW MC

DIBIFLOW 300

DIBIFLOW EV

THE WINNING SOLUTION FOR ANY KIND OF NEED IN TERMS OF SINGLE-DOSE PACKAGING

High quality and manufacturing standards for machines that stand out for being easy-to-use, designed and customized according to the most varied flowpack packaging requirements.

- ✓ HIGH TECHNOLOGY
- ✓ EASY TO USE
- ✓ VERSATILITY

DIBIFLOW 500

BAGGING SYSTEMS

SPEED BAG EV

SPEED BAG EV

The simplest and most cost-effective solution to quickly bag small series of printouts and publications of any kind.

Optional discharge belt

CONVENIENT AND COMPACT

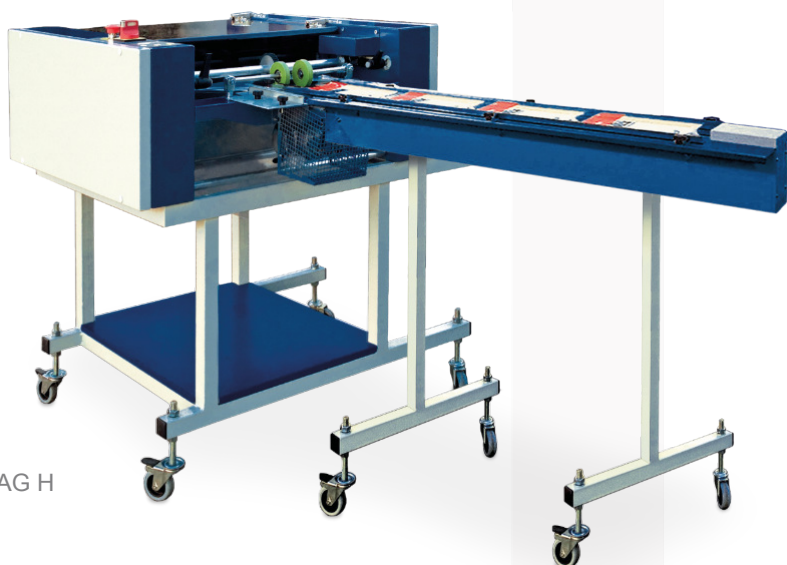

SPEED BAG H EV

Automatic horizontal bagging, production cycle controlled by a PLC with controls on a touch-sensitive display. Internal compressor

The ideal solution for medium-high bagging and mailing requirements for catalogues, lists, manuals, newspapers, etc.

THE BEST VALUE FOR MONEY

It can reach up to 2400 pcs/h

SPEED BAG H

IN-LINE BAGGING

SPEED BAG HS

FAST, FUNCTIONAL, SIMPLE: ALL IN ONE MACHINE

Top manufacturing standards.
High quality components.

SPEED BAG HS

IDEAL

for bagging in polythene bags (and bags of other materials) magazines and books combined with CDs, videos, sheets and cards, other magazines... with the possibility of in-line insertion of different types of chargers, address-placers, etc.

ROBOT WRAPPING SYSTEMS

LEONARDO

ELECTRIC MANOEUVRING SYSTEM PAT.

Reduces the working area even more in comparison with most robots

TELESCOPIC MAST PAT.

Makes handling and transport easier inside the operating areas

100% POWER PRE-STRETCH SYSTEM PAT.

Fitted as standard - allows to work using film of less good quality

MICROPROCESSOR LOGIC BOARD PAT.

6 different pre-programmable memorized settings

MAINTENANCE FREE AND SEALED BATTERIES

No fill - recharged from standard 220 Volt power supply in any place

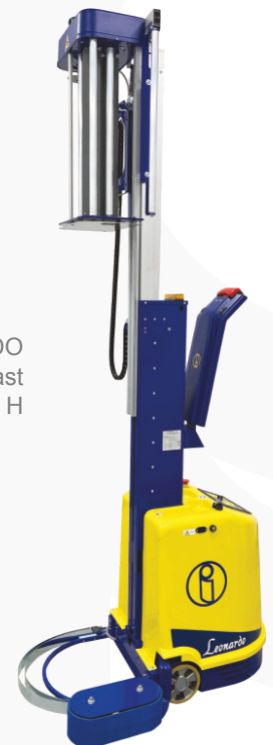

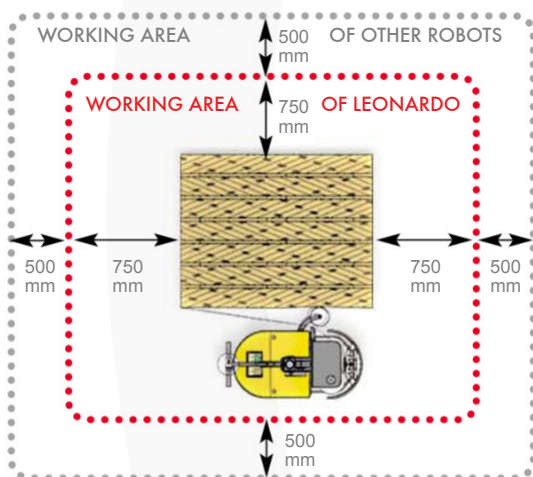

REDUCED OVERALL DIMENSIONS AND WEIGHT

Approximately 50% less than most robots

EASY SHIPPING

No parts to be assembled, ready to work

UNBELIEVABLE REDUCED WORKING AREA

LEONARDO

JOLLY WORK

THE LATEST INCREDIBLE INNOVATIVE IDEA: **THREE SYSTEMS IN ONE**

Jolly Work, wrapper and lifter, the 3 in 1 system that solves every packaging need and protects the health of operators. It starts as a simple pallet wrapper with stretch and pre-stretched film (Jolly Wrap), but the addition of the second roll accessory allows the composition of the pallet in half the time (Jolly Twin), while with the addition of the accessory plate (Magic Plate), it also becomes a box lifter and wrapper (Jolly Work), incredibly helpful for the preparation of the load. The device, equipped with various options, can be transformed, without any assembly and disassembly operation, into a pallet wrapper or box wrapper and lifter.

JOLLY WORK TO SAVE TIME, MONEY, EFFORTS AND SAFEGUARD THE HEALTH!

It saves operator effort, preventing back damage, commonly spread among logistics operators, increases productivity and profitability of the work, improves the result, facilitates and allows to wrap higher loads.

NEW AIR IN HEAT-SHRINKING THANKS TO ITALDIBIPACK FORMULA

GREENFILM

- ideal for semi automatic, automatic and even manual machines
- fully recyclable and environmentally friendly
- suitable for food-grade applications and at low temperatures (frozen)
- its properties do not change even after long storage periods
- available rolls: from 200 to 700 mm
- thicknesses: 15, 19 and 25 micron

BLUEFILM

- ideal for one step and semi-automatic machines
- high transparency
- excellent sealability even at high speeds
- very high shrinking properties at low temperatures with excellent results even on small pieces
- available rolls: from 200 to 800 mm
- thicknesses: 18, 20, 30 and 40 micron

GOLDENFILM

- ideal for automatic machines due to their special cross-linked molecular structure
- suitable for food applications
- high mechanical strength of sealing even at high speeds
- excellent retraction at both low and high temperatures
- available rolls: from 200 to 700 mm
- thicknesses: 15 and 19 micron

AVAILABLE FILMS FOR EVERY PACKAGING NEEDS

HEAT-SHRINKING POLYETHYLENE FOR SLEEVE-WRAPPING

Available in rolls from 500 to 1250 mm wide. Available thicknesses: from 40 to 100 micron.

HEAT-SHRINKING POLYETHYLENE FOR BAGGING MACHINES

Upon request available in different widths and thicknesses.

SINGLE-FOLDED HEAT-SHRINKING POLYETHYLENE FOR FULL CLOSURE SEALING

Available rolls from 250 to 600 mm wide. Available thicknesses: 25-60 micron.

SINGLE-FOLDED, MICRO-PERFORATED HEAT-SHRINKING POLYOLEPHINE FOR FULL CLOSURE SEALING (ESPECIALLY FOR BREAD)

Available rolls from 200 to 600 mm wide. Available thickness: 15 micron.

CLING FILM FOR FOOD APPLICATIONS

Available rolls of 1500 mm wide. 11 micron thickness.

SKIN-PACK FILM: ADHESIVE and NOT ADHESIVE SKIN ECOSKIN

These are materials to be glued on (micro perforated and non-micro perforated) cardboard. Available in rolls of 390 and 560 mm wide. Various thicknesses: 100, 150, 200, 250, 300 micron.

PRINTED SHRINK WRAP FILMS

Upon request, polyolefin films, both laid-out and single-folded, printed in 1 or more colours. Various thicknesses.

*PE stretch industrial and extensible polithene,
different kind of stretch film available in stock.*

PE stretch 500/23

PE stretch 500/23 prestretchable up to 240%

HISTORY

IN 1975 ITALDIBIPACK GROUP WAS BORN. IT IS THE BIRTH OF A STAR.

Its light, even nowadays, is the main reference for thousands of Companies in Italy as well as abroad.

*ITALDIBIPACK Group born from Mr. **Luciano Butturini**'s vision, the founder, who was able to interpret the possibilities of an evolving historical period, and to impose himself within few years' time with innovative and cutting-edge solutions reserved to his growing clientele, always "ad hoc" and with the clear will to reply to complex issues with simple answers.*

Packaging becomes simplified. A true packaging democracy, where every reality is never too small to be emancipated by the need to ask to the others to solve their internal needs.

*These are the years when the very well-known DIBIPACK, ESPERT, MECPACK lines were conceived: **DIBIPACK** line, unforgettable and essential models for all that Companies that require the most differentiated packaging; **ESPERT** line for all those Companies needing to achieve medium-large production with the best value for money. Last but not least, the most accomplished project of the **R&D ITALDIBIPACK**, the **MECPACK** line: the fully automatic L-sealer combined with heat-shrinking tunnel for all that Companies in need of high speed output, conscious of their potential and not afraid to claim their place and therefore in need of more advanced and technologically advanced choices.*

ITALDIBIPACK Group approached the flourishing of the 80's, capitalizing the productive and development efforts of the previous years, not forgetting its vocation to astonish and not to waste its ability to win the challenge to improvement.

The 90's were, therefore, the logical consequence of the history of previous years.

Europe sees its ideological and political barriers falling down, and invites everyone to think back to himself in a world where the possibility of renewal appears the only possible approach to stay connected with a safety past.

At the end of the decade ITALDIBIPACK Group enriches its range with the "End of Line" division.

*Here are designed and developed the best pallets wrapping solutions: first turn table machines and full pallet wrapping line, and then the most genius robot family in the world: **LEONARDO**.*

It is official, the Company that brought the heat-shrinking in the world of packaging, aims to become global, opening up to the real logistics world. Not only with the wrapping pallets systems but also with all taping and strapping operations that precede the final act before the shipment.

DESIGN

The attractive design of ITALDIBIPACK Group certainly embodies the ideal of lines and essential shapes, emphasizing a technological choice that focus on the result.

A special place is reserved here to the **SWING** model, the heat-shrinking sealer that revolutionized the concept of manual packing, becoming an inspired example of style and elegance, together with the **MECPACK** model, the automatic packaging machine par excellence. Fast, practical and beautiful..

DESIGN

RESEARCH & DEVELOPMENT

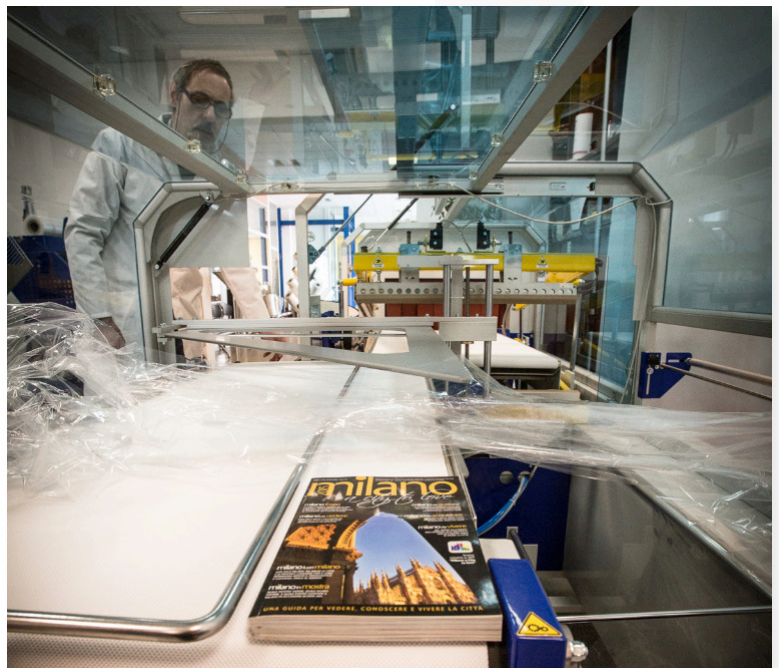

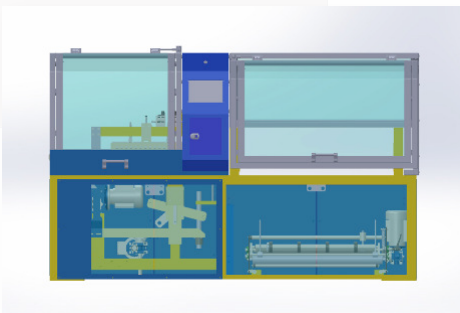

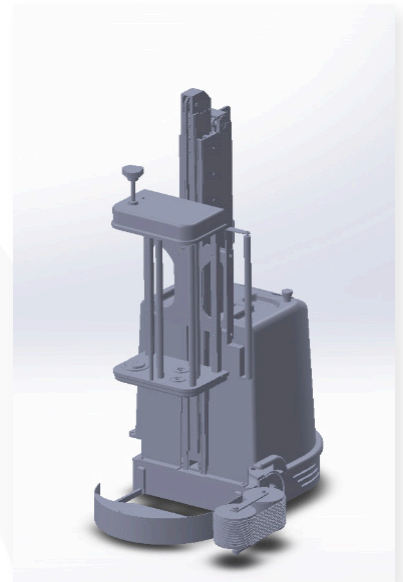

ITALDIBIPACK and the R&D (Research & Technical Development) are faces of the same medal.

The attention that ITALDIBIPACK has been reserving to the improvement of its range of machines constantly and strongly growth through the years, exactly like its constant attention in listening to the Customers' requests.

40 years spent in the quality and efficiency improvement, to always offer the best services, the best design, the most adequate ergonomic and functional product.

The safety and the reliability of ITALDIBIPACK's products is a guarantee that only such a specific experience can transmit.

40 years spent at the service of each packing exigence have been permitting to develop a know-how, a specific attention to each detail, a caring for the product that the ITALDIBIPACK R&D daily develops and brings in the packaging world, without equals.
